

OUR SERVICE IS OUR **ONLY** CONTRACT

## Maintenance Technician

### Role

In this full-time role, a Maintenance Technician will report to the Maintenance Manager. The Maintenance Technician diagnoses, evaluates, and repairs automated manufacturing equipment.

### Responsibilities

The Maintenance Technician is responsible for repairing and maintaining machines and equipment throughout the company. Examples of tasks include clearing jams, changing sprockets and bearings, performing preventative maintenance, rebuilding diaphragm and solvent pumps, and general reassembly of machines after repairs are completed. Experience with electrical repairs on machines is a must. The Maintenance Technician will also be responsible for acquiring the necessary skills and knowledge of all facility machines and processes. General computer knowledge is necessary to complete work orders and search inventory.

### Skills & Values

This position requires a strong work ethic and physical endurance as well as the ability to work in a team environment or individually. Time management is essential as repairs must be done quickly but thoroughly. The ability to solve problems and handle competing priorities is necessary. The individual will also strive to fulfill the company values of honesty, integrity, excellence and relationships.
